

Student Support Program (SSP) was designed to be an opportunity for the Senior SSP/SACP affiliates to **mentor** the Student SACP affiliates. As students, we are interested in knowing what type of occupations are available for a science degree. What did your educational path entail? Have you always envisioned yourself in the position that you are in today? How do we accomplish our dreams of becoming an impactful scientist? Any advice or input is welcomed. **Partner** with us students, we desire to be mentored by **you!**
